## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

**Claims 1 and 9** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is of the examiner's opinion, that the portion of claim 1 and 9 that states, "decreasing a degree by which calculated color temperature is utilized in the white balance correction value", lacks a written description. The written description is not met, because the information showing that the applicant has invented the subject matter which is claimed is unclear. The description does not clearly allow one of ordinary skill in the art to recognize that the applicant invented what is claimed. The specification does not clearly teach of what is meant by "decreasing a degree by which calculated color temperature is utilized".

**Claims 1 and 9** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is of the examiner's opinion, that the portion of claim 1 and 9 that states, "decreasing a degree by which calculated color temperature is utilized in the white balance correction value", lacks enablement. The enablement requirement is not satisfied, because after reading the specification, one of ordinary skill in the art cannot practice the claimed invention without undue experimentation.

Regarding dependent **Claims 2-8 and 10-16**, these claims are rejected as being dependent on rejected base claims 1 and 9.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2622

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
